EXPERIENCE

React Developer

TKLABS, Inc., Sunrise, FL, USA *May 2022 - Present*

- **Led frontend development** of an IT management web app with React.js, improving UI responsiveness and cutting **page load times by 30%** for 50+ internal users.
- Collaborated in Agile sprints with PMs & backend engineers, delivering features that **reduced release cycles by 25%** and improved stakeholder satisfaction.
- Built **reusable component libraries**, reducing redundant code by **40%** and accelerating feature delivery across multiple projects.
- Integrated **RESTful APIs & GraphQL**, improving real-time updates and reducing response times by **20%**, enhancing user experience.
- Implemented **SSO authentication** (Auth0, Azure AD, Okta), simplifying logins and improving security for regulated clients.
- Refactored UI components by migrating from **Ant Design** to **Material UI & Telerik**, reducing bundle size and boosting frontend performance.
- Strengthened reliability by writing **integration tests with Jest & React Testing Library**, reducing regression bugs and increasing release confidence.

PROJECTS

My Meet AI - Live, GitHub

- Designed and developed a modern **SaaS** platform that augments traditional video calls with **real-time AI agents** which actively participate during meetings (e.g., language tutor, sales assistant, interview coach).
- Built full-stack architecture using **Next.js with TypeScript, tRPC & TanStack Query** for type-safe APIs, ensuring efficient client-server communication.
- Integrated real-time AI interactions via **OpenAI's Realtime API** and **Stream Video SDK** to enable live video calls.
- Implemented backend functionality with **Drizzle ORM** on **PostgreSQL (Neon)** for robust data persistence, and **Inngest** for background job processing (e.g., session events, recording workflows).

AI Teaching Companion - Live, GitHub

- Built a real-time **LMS SaaS** platform with **Next.js** and **Supabase**, featuring secure user authentication powered by **Clerk**, and subscriptions & payment integration via **Stripe**.
- Integrated **Vapi's AI vocal agent** to power interactive, voice-driven teaching sessions, enhancing engagement and accessibility for learners.
- Developed scalable, **subscription**-based architecture with modular components and real-time data synchronization, ensuring seamless performance across devices.

Travel Agency Dashboard - Live, GitHub

- Developed an AI-driven itinerary generator using **React 19** and **Appwrite**, enabling users to create personalized trip plans tailored to preferences like country, budget, travel style, and group type.
- Built a secure, scalable web platform with **OAuth**-based authentication, modular **React** components, and a modern responsive UI designed with **Tailwind CSS** for seamless cross-device accessibility.
- Implemented advanced analytics and admin dashboards leveraging **Syncfusion** and **Appwrite**, providing real-time trip statistics and growth metrics.

EDUCATION

Sheridan College **Oakville, ON, Canada**

Associate Degree in Computer Science *Sept. 2021*

Relevant Courses: Object Oriented Programming, Data Structures and Algorithms, Web Development, Database Design & Implement, Interactive User & Software Design Fundamentals, Computer & Network Security

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind, Material UI, Telerik, Shadcn UI
Backend & Databases: Node.js, Python, GraphQL, REST APIs, Inngest, Neon, Supabase, Firebase, MySQL
Authentication & Security: OAuth, SSO (Auth0, Azure AD, Okta), Better Auth, Clerk, Stripe, Polar
DevOps & Tools: VS Code, Claude Code, GitHub Copilot, Cursor, Git, Sourcetree, Postman, Docker, Vapi
Testing: Jest, React Testing Library
